

Resume Building Session

Key Points

ATS (Application Tracking System)

Lots of resumes are rejected for online jobs just because ATS can't extract the information it needs due to design.

Avoid: graphics, icons, tables

Professional + Competent

ATS - compliant

large scale

① keywords

ML, DL, sch; Pytorch
SVM, Decision, Numpy
Pandas

② fancy elements X
unnecessary

③ customize

DA

DS / AI Engg.

- PowerBI
- Tableau
- Excel

Where to make Resume?

Google docs

Microsoft word

Canva

Overleaf

Novaresume

Resume.com

Layout

Single page

section wise (row & column)

use bullet points

Font

simple & readable (Calibri, Arial, Georgia etc.)

max 2

black/blue

Content

You don't need to include your photo, DOB, marital status & other personal info

Name, Contact Info, Relevant Links on Top

Divide into **Sections**

- Skills
- Education/ Academics
- Projects
- Experience
- Achievements
- POR/ Hobbies

(Position of Responsibility)

① email

→ professional / create personal
title

② phone

① LinkedIn Profile

② GitHub

③ Kaggle

Skills → Tech related skills

Programming - Python, SQL ..., Javascript

NumPy, Pandas, Matplotlib, Scikit-learn, PyTorch

Git & Github, Docker

AI engg
Data Science

Genuine Skills that you can talk about

Education

College | Degree/ Branch | Graduation Year | CGPA or %age

School Name | Year | Marks - 12th

School Name | Year | Marks - 10th

Extra - JEE Rank, University Rank

Department

Projects + Work Experience is your most important Section

class ANN
KNN

Students/ Fresher

Education
